PROFILE

- Pursuing a B.Tech in Computer Science Engineering at the University of Calcutta main campus, with a strong commitment to academic excellence and a passion for technology.
- Solid academic background with a B.Sc in Mathematics Honours, providing a strong analytical foundation that complements my technical skills.
- Proficient in Java and advanced Java, enabling the development of robust and scalable software applications.
- Skilled in frontend development, including HTML, CSS, and Bootstrap, capable of crafting visually appealing and user-friendly web interfaces.
- Holder of a certificate from IBM Skill Build, demonstrating my competence in web development and programming.
- Aspiring to join the Goldman Sachs summer analytics/summer associate internship program, with a strong interest in applying my technical and analytical skills to real-world financial challenges.
- Exceptional problem-solving abilities, honed through academic coursework and practical projects, ready to contribute innovative solutions to complex problems.
- A collaborative team player with effective communication skills, fostering productive teamwork and project success.

WORK EXPERIENCE

JUNE- JULY 2023

internship from IBM SkillsBuild

IBM

- Completed an internship at IBM Skill Build, gaining practical experience in web development and problem-solving within a real-world corporate environment.
- Earned a certificate in web development from IBM, showcasing proficiency in essential web technologies and development practices.
- understanding of front-end technologies, including HTML5, CSS3 and bootstrap to create responsive and user-friendly web applications.
- Problem-solving and debugging skills, honed through hands-on experience in identifying and resolving coding issues.
- Collaborative team player with excellent communication skills, able to work effectively in cross-functional teams and contribute to project success.
- Proactive learner, continuously seeking to expand knowledge in emerging technologies, best practices, and industry trends in computer science and web development.

PROJECTS:-

Employee Management System

- Description: Developed a comprehensive Employee Management System using Java that streamlined HR processes. The system allowed for efficient employee data management, including employee information, attendance, payroll, and performance evaluations.
- Role: Sole developer responsible for the design, development, and implementation of the system.
- Technologies Used: Java, Java Swing for the GUI, and MySQL for database management.
- Achievements: Increased the efficiency of HR operations, reduced manual data entry errors, and provided a user-friendly interface for HR personnel.

Notepad Application

- Description: Designed and implemented a lightweight text editor similar to the Windows Notepad application. This project aimed to provide essential text editing features with a simple and intuitive user interface.
- Role: Lead developer responsible for the project's architecture, coding, and testing.
- Technologies Used: Java for the core functionality, Java Swing for the file handling for text editing.
- Achievements: Successfully created a functional text editor with features like text formatting, file saving, and opening. Received positive feedback from users for its simplicity and effectiveness.
